17 March 2005

Dear Sir.

Please find attached my revised quotation to carry out the work to narrowboat Olympic.

I have included one more 110Ah battery to the domestic battery bank, as I feel these batteries are more readily available at your local chandlery.

I have modified the quotation, hopefully it is easier to understand and the total, before the inclusion of the fourth battery, is actually less.

I am still investigating the possibility of operating the original tachometer from the Barrus / Leece Neville units.

If you feel the quotation is acceptable and a date for the work to commence can be arranged, a deposit of £1,301.54 would be required for purchase of the parts, the balance of £1,038.52 to be paid on completion.

If you have any questions with reference to this quotation, please contact me at the above.

Yours sincerely,

S.M.S Yates.
